Sri Eshwar College of Engineering	<b>BE Computer and Communication Engineering</b>	CGPA: <b>7.50 (Upto 3rd Semster)</b>
Vikas Vidyalaya Matric Hr Sec School	<b>HSC</b>	Percentage : <b>87.00%</b>
Vikas Vidyalaya Matric Hr Sec School	<b>SSLC</b>	Percentage : <b>79.50%</b>

## INTERNSHIPS

### Mern Stack - Better Tomorrow

- Designed a Contact Management application incorporating a login page, signup page, home page, and functionalities for adding Number to the backend.
- The backend logics and security measures were implemented to ensure enhanced functionality and protection.

**Tech stack:** Node JS, React JS, Mongo DB, Express JS

## PROJECTS

### Contact Management

[Github](#)

- The Contact Management System is a modern software solution developed using the MERN stack, which comprises MongoDB, Express.js, React.js, and Node.js
- It provides users with a streamlined platform to organize, store, and manage their contacts effectively.

**Tech Stack:** Node JS, React JS, Mongo DB, Express JS

### Online Survey System in JAVA

[Github](#)

- The online survey system is a JavaFX application created using Scene Builder for designing the user interface.
- It facilitates the creation, distribution, and analysis of surveys, providing an interactive platform for users to participate in surveys and for administrators to manage survey data for designing the user interface

**Tech Stack:** Java, JavaFx, SceneBuilder

### Car Inventory Management System

[Github](#)

- The Car Inventory Management System is a robust software solution developed using Java, JavaFX for the user interface, and MySQL for database management.
- It serves as a centralized platform for car dealerships or rental agencies to efficiently manage their inventory, streamline operations, and enhance customer service.

**Tech Stack:** Java, JavaFx, JDBC, MySQL
